

The Aero Adventure Aventura

The Aero Adventure Aventura is the world's best-engineered, and best-performing Amphibious of all time. There is no better way to honor a legacy than to continue it. The Aventura has been in production since 1995, keeping its essence intact while using modern technology, parts, and materials to improve performance, reliability and comfort.

There are two ways to build your Aventura. You can use parts from a Base Kit. or you can get all-new SLSA Factory Built option. Either way you choose to build your Aventura, we have engineered the kit to make the process of building your own airplane as simple and straightforward as possible.

The original Aventura was based on the innovation of using an independent airframe and a high-speed hull design unmatched by any others. The concept was, and still is, strong and simple.

The artistry and strength of the Aventura airframe would be a waste without an equally well-designed Hull and Engine package. Computer simulations and hundreds of hours in the air under the most extreme conditions have helped our engineers design world-class upgrades that deliver great performance and comfort.

The connection between man, machine, and the sky is experienced behind the stick. We've striven to capture the essence of the luxury interior while improving on cockpit space, ergonomics, sound/heat control and safety features.

People will look long and hard at the outside of your creation, so the exterior and trim of the airplane is as important as what is powering it. We provide authentic American made parts that hold up well to scrutiny.

Our Safety Record Is No Accident

Today's Aventuras are stronger, faster, and safer than the originals.

Aventura Airframe

A great airplane starts with a great airframe. Today's fourth-generation Aventura frame has benefited from years of refinement and development. It is both lightweight and strong.

lifestyle

The Aventura II will allow you to satisfy your emotional desire to experience a lifestyle and to be the best version of yourself. This takes a deep understanding of who you are as a pilot. Aero Adventure understands and will amplify what originally connected you to aviation.
